Medication Authorization
Over the Counter Medication & Prescription Medication

All medication must be in its original container, labeled with the child's full name and current usage date. Over the counter medication must be accompanied by written authorization from the child's physician indicating dosage. Medication labels (such as labels found on amoxicillin – can serve as the physician's signature.) All over the counter medications require physician signatures (on script pad). All allergy and asthma medications must be accompanied by an allergy or asthma action plan.

Child's Name: _____

Name of Medication: _____
